Why is it that so many people in the strata industry settle for average results yet work so hard each and everyday?

It's often said that to be successful requires more hours than there are in a day, a continued drive to diligently work just to 'get it all done', and the ability to wear a myriad of hats that quite honestly, don't always fit! But why would we continue the struggle and lose the balance of work, rest and play, when we can have it all?
